

**Coming to AUA2019:**

## **Gender-affirming Genital Surgery**

*A new AUA course presented in collaboration with GURS*

**Thursday, May 2**

### **1:00 – 5:35 PM / Optional Morning Session**

Course Overview: Gender-affirming Genital Surgery is a new course presented by the AUA in collaboration with the Society for Genitourinary Reconstructive Surgeons (GURS). This course will consist of a series of lectures and panel discussions by leaders in gender-affirming genital surgery. Faculty will include expert urologists and plastic surgeons from the U.S. and Europe. Lectures will focus on surgical and anatomic details needed to perform vaginoplasty, metoidioplasty, phalloplasty, and implant surgery after phalloplasty, as well as discussion on how to treat complications and revisions. The course is meant for surgeons that have an active surgical practice, are considering starting a surgical practice, or are treating the complications associated with gender-affirming genital surgery. Join us starting at 9 a.m. for an optional session which will focus on gaps in knowledge and outcomes reporting in gender-affirming surgery research. This group's discussion will be summarized into a document that makes recommendations about these topics.
